This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

The social cost of carbon (SC-CO₂) is an economic metric intended to provide a comprehensive estimate of the net damages - that is, the monetized value of the net impacts, both negative and positive - from the global climate change that results from a small (1-metric ton) increase in carbon-dioxide (CO₂) emissions. Under Executive Orders regarding regulatory impact analysis and as required by a court ruling, the U.S. government has since 2008 used estimates of the SC-CO₂ in federal rulemakings to value the costs and benefits associated

with changes in CO₂ emissions. In 2010, the Interagency Working Group on the Social Cost of Greenhouse Gases (IWG) developed a methodology for estimating the SC-CO₂ across a range of assumptions about future socioeconomic and physical earth systems. Valuing Climate Changes examines potential approaches, along with their relative merits and challenges, for a comprehensive update to the current methodology. This publication also recommends near- and longer-term research priorities to ensure that the SC-CO₂ estimates reflect the best available science.

» The world's most-comprehensive look at the American automobile. Year-by-year coverage of all major makes, from 1930 to today. » More than 3,500 photos. Includes the GM-Ford-Chrysler Big 3, plus the spectrum of makes from Allstate and AMC, through Duesenberg and LaSalle, to Tucker and Willys. » Authoritative reports on the cars, the companies and the individuals behind them. Detailed specifications charts include horsepower, original prices, annual production volume, and much more.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don ' t perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

When our world finally collapses and begins to fade away, the only chance of survival is to create a new and better earth. With millions of people paying all they have to become one of the saved and make it to New Blue 1 (the new earth) everyone who cannot pay is simply left behind to die along with the planet. Silas is just another one of the forgotten, but when he is forced to surrender himself to a risky experiment, he finds that the fate of humanity is left in his hands. Unsure about his new abilities, and desperate to save the lives of those left behind, will Silas stumble upon a secret that changes the

course of the future?

From the bestselling author of *The Power of Habit* comes a fascinating new book exploring the science of productivity, and why, in today's world, managing how you think--rather than what you think about--can transform your life. Productivity, recent studies suggest, isn't always about driving ourselves harder, working faster and pushing ourselves toward greater "efficiency." Rather, real productivity relies on managing how we think, identify goals, construct teams and make decisions. The most productive people, companies and organizations don't merely act differently--they envision the world and their choices in profoundly different ways. This book explores eight concepts that are critical to increasing productivity. It takes you into the cockpit of two passenger jets (one crashes) to understand the importance of constructing mental models--telling yourself stories about yourself in order to subconsciously focus on what really matters. It introduces us to basic training in the U.S. Marine Corps, where the internal locus of control is exploited to increase self-motivation. It chronicles the outbreak of Israel's Yom Kippur War to examine cognitive closure--a dangerous trap that stems from our natural desire to feel productive and check every last thing off our to-do lists, causing us to miss obvious risks and bigger opportunities. It uses a high-achieving public school in Cincinnati to illuminate the concept of disfluency, which holds that we learn faster and more deeply when we make the data harder to absorb. It shows how the principles of lean manufacturing--in which decision-making power is pushed to the lowest levels of the hierarchy--allowed the FBI to produce a software system that had eluded them for years. It explores how Disney made *Frozen* into a record success by encouraging tension among animation teams--a version of what biologists refer to as the Intermediate Disturbance Hypothesis, which posits that nature is most creative when crises occur. With the combination of relentless curiosity, deep reporting and rich storytelling that defined *The Power of Habit*, Charles Duhigg takes readers from neurology laboratories to Google's brainstorming sessions and illustrates how we can all increase productivity in our lives.

In November, GM CEO Rick Wagoner appeared before Congress to ask for \$25 billion to bail out the struggling Big Three automakers. To critics like Thomas Freidman and Mitt Romney, it was a sign that the American auto industry should be led out to pasture; if the Japanese are

better at making cars, they said, then we should let them do it. To defenders, the loss of the country's largest manufacturing sector would be an incomprehensible disaster. Nearly every day, the debate rages on the op-ed pages. Billions of dollars and millions of jobs hang in the balance. In *Why GM Matters*, William Holstein goes deep inside GM to show what's really happening at the country's most iconic corporation. Where critics say that GM has sat on its hands while the market changed, Holstein demonstrates that GM has already radically retooled its entire operation, from manufacturing and cost structure to design. Where pundits say we'd be better off without GM, he shows how inextricably linked GM and the nation's economy still are: The country's largest private buyer of IT, the world's largest buyer of steel, the holder of pensions for 780,000 Americans, GM accounts for a full 1 percent of our country's GDP. A dollar spent on GM has profoundly different consequences from a dollar spent on Toyota. Following a diverse cast of characters--from Rick Wagoner, the controversial CEO, to design director Bob Boniface, to Linda Flowers, a team leader on the line in Kansas City--Holstein examines the state of GM's health and builds a persuasive argument that GM is essential to our nation's well-being and, with the right economic climate, ready to compete with Toyota as one of the biggest global automakers.

Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches.

50 Years of Road & Track

Long known as the most consumer-oriented car buyer's guide, The Car Book 1999 has maintained the classic simplicity that for 18 years has led hundreds of thousands of car buyers to the best choice in new cars. While other car guides offer only manufacturers' specifications, The Car Book 1999 sifts through the claims, the facts, the specifications and, with unique performance measurements, evaluates this year's new cars and minivans. With the 1999 edition of The Car Book, Jack Gillis once again proves why he is America's most sought after consumer expert on cars. One-Page Reviews: tell you how a vehicle performs in areas you care about and how the car stacks up against the competition. Easy-to-Read Ratings: provides overall value, crash test, fuel economy, preventive maintenance, insurance costs, consumer satisfaction, and more. Safety Features: is an at-a-glance listing of today's key safety features including airbags, ABS, built-in child seats, and daytime running lights. Narrative Summaries: for each model highlighted what's new and offer you insightful advice. Jack Gillis' "Best Bets": America's favorite list of top-rated cars. Special Advice: on showroom strategies, avoiding lemons,

the best warranties, selecting the best child safety seat, saving on insurance, and more. Forward: by Clarence M. Ditlow, Executive Director Center for Auto Safety

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instill this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

It was 1934; the time of the Great Depression and Keith Watts was living a simple life and doing a simple job driving his train on the Southern Line. It was the uncomplicated existence he chose where he was in control and there was little possibility

of being hurt again. Then he does a reckless thing by stopping his train to pick up a little, roving girl on the uphill run to Gooseneck Pass. He follows this with even more folly when he decides to accompany the girl on her quest to find a rich grandmother she has never met. Armed with scanty resources, they set out on foot on a journey that has Watts doing things he never imagined and feeling things he tried so hard to escape. Has the strange, shy girl with the weird way of expressing herself, touched his life and the lives of others they meet along the way? Or is a series of coincidences forcing the changes? And just how far can love transcend all barriers? A story packed with drama, mystery, adventure, and humor.
