Curriculum and Teaching Dialogue is the journal of the American Association of Teaching and Curriculum (AATC). An important historical event in the development of organizations dealing with the scholarly field of teaching and curriculum was the founding of the AATC on October 1, 1993. The members of the AATC believed that the time was long overdue to recognize teaching and curriculum as a basic field of scholarly study, to constitute a national learned society for the scholarly field of teaching and curriculum (teaching is the more inclusive concept; curriculum is an integral part of teaching-the "what to teach" aspect). Since it's founding AATC has produced scholarship in teaching and curriculum and serves the general public through its conferences, journals, and the interaction of its members. The purpose of the organization was originally defined in Article 1, Section 2 of the AATC Constitution: "To promote the scholarly study of teaching and curriculum; all analytical and interpretive approaches that are appropriate for the scholarly study of teaching and curriculum shall be encouraged." Curriculum and Teaching Dialogue seeks to fulfill that mission. Great appreciation gift on any gift-giving occasion! [This book's] fundamental thesis is a rather challenging one - the idea that the unified, singular "self," which we all take for granted we possess, does not exist... fascinating and important... I will certainly revisit the book... when you're ready for a challenge, this book is certainly worth dipping into' - "Counselling News" I thoroughly recommend this book. I found it challenging, provocative, exciting and full of delights. (It makes such a change to be told that ideal personality characteristics would include a Monty Pythonesque sense of humour and a tolerance of mind-altering drugs!) While reading it I often felt nourished and refreshed" - The Journal of Critical Psychology, Counselling and Psychotherapy "With the emergence of postmodern thinking, the notion of a unified, singular self' appears increasingly problematic. Yet for many, postmodernism's proclamation of the death of the subject' is equally problematic. As a response to this dilemma, there has been a rise of interest in pluralistic models of the self' in which the person is conceptualized as a multiplicity of subpersonalities, as a plurality of existential possibilities or as a being' which is inextricably in-dialogue-with-others. Bringing together many disciplines, and with contributions from foremost writers on self-pluralism, The Plural Self overviews and critiques this emerging field. Drawing together theory, research and practice, the book expands on both the psychological and philosophical theories underlying and associated with self-pluralism, and presents empirical evidence in support of the self-pluralistic perspective, exploring its application within a clinical and therapeutic setting. Confidence is, to a limited extent, a result of how we have been raised and how we've been educated. We gain from others how to consider ourselves and how to carry on - these exercises influence what we accept about ourselves and other people. Confidence is likewise a result of the encounters and how we've figured out how to respond to different situations. Shyness is an emotion that influences how a person feels and carries on around others. Shyness can mean feeling uncomfortable, reluctant, anxious, bashful, hesitant, or unreliable. People who feel shy sometimes see physical sensations like becoming flushed or feeling stunned, unsteady, or winded. Shyness is simply something contrary to being at ease with yourself around others. When people feel shy, they may delay to state or accomplish something because they're feeling uncertain of themselves and they're not prepared to be taken note. Some key information in the book are: -Overcome self-doubt-Ways to Overcome Shyness and Social Anxiety-Overcoming personal fear-Overcoming doubts-Overcoming lack of confidenceWhen we remain in the comfort zone shielded from these experiences by the recognition of routine exercises, we live unconscious of the capacity to develop and grow new qualities and aptitudes. The less we experience open doors for mix-ups and disappointment, the more terrified we become of what could occur if we were to step outside of the comfort zone. Nonetheless, when we dive in, even without confidence in the capacities, courage dominates. In the realm of the known, confidence works with no impediment, however, in the realm of fear of the obscure courage dominates. Courage is typically a more respectable trait than confidence because it requires more noteworthy quality, and typically a courageous individual is one unbounded for development and achievement.

"Written by some of the leading thinkers in the field, the book is an excellent resource for longstanding and contemporary issues in cultural theory. Comprehensive and well-written." - David Oswell, Goldsmiths College This timely volume provides a framework for understanding the cultural turn in terms of the classical legacy, contemporary cultural theory and cultural analysis. It reveals the significance of Marxist humanism, Georg Simmel, the Frankfurt School, Stuart Hall and the Birmingham School, Giddens, Bauman, Foucault, Bourdieu and Baudrillard. Readers receive a dazzling, critical survey of some of the primary figures in the field. However, the book is much more than a Rough Guide tour through the 'great figures' in the field. Through an analysis of specific problems, such as transculturalism, transnationalism, feminism, popular music and cultural citizenship, it demonstrates the relevance of cultural sociology in elucidating some of the key questions of our time.

This fantasy novel takes readers into a world of deserts and elemental magic and cultures that rarely get explored in fantasy novels. Readers will love the strong female protagonist as she fights society's rules, her own struggling magic, and the elements of nature to save people. Twins born at a time when such an event hasn't been seen in centuries. Some fear them, others revel in their arrival, but no one is prepared for the chaos they will bring to the region. Only, this isn't the first time the pair has caused such disaster. They've been around for centuries, a period of twelve cycles in time with their generation. No one remembers their previous existence except those who are sworn to guard the twins through the thirteenth and final cycle. Evolution has been waiting for this point in time, the precise moment when everything aligns with the prophecy foretold by the ancients at the beginning. But there's a catch... Creatures from the underworld want the region for themselves, and to destroy the ancients along with their prophecy. An attempt had been tried before and failed. However, now the creatures know what they did wrong, and see the birth of the twins as a means to undo everything the ancients have done. The twins are now endangered by everyone they meet. Will they be able to make the prophecy come true? Their lives, and humanity, depend on it.

These essays on the economics of fiscal federalism contains original research by experts in North America and Europe on a timely topic. Reform of fiscal relations between central and subnational governments is an urgent priority in many countries since increased economic integration within and among countries means that goods, services, capital, and human resources can flow across political boundaries more easily than before. The structure of intergovernmental transfers, tax competition, and the fiscal implications of labor migration are analyzed for audiences in economics, political science, and public policy.

Since the fall of the Iron Curtain, formerly socialist countries have gone through manifold transformations, whilst remnants of socialism remain ubiquitous. The volume explores various spaces of the postsocialist landscape, presenting a mixture of real and imaginary spaces, of memory and nostalgia, of aesthetic and political symbolism, of the global East and the global South, of academic and essayistic writing. It casts a glance at the heterogeneous relics of socialism and their transformation in very different parts of the world. From the description of (post-)socialist interiors, façades, neighborhoods, parks, monuments, and objects towards the imaginary spaces of literature, the contributors describe the concreteness and intimacy of some of the places that span across and even beyond of what is left of the »second world« today.
