Developed by I Corps Foreign Language Training Center Fort Lewis, WA For the Special Operations Forces Language Office United States Special Operations Command LANGUAGE TRAINING The ability to speak a foreign language is a core unconventional warfare skill and is being incorporated throughout all phases of the qualification course. The students will receive their language assignment after the selection phase where they will receive a language starter kit that allows them to begin language training while waiting to return to Fort Bragg for Phase II. The 3rd Bn, 1st SWTG (A) is responsible for all language training at the USAJFKSWCS. The Special Operations Language Training (SOLT) is primarily a performance-oriented language course. Students are trained in one of ten core languages with enduring regional application and must show proficiency in speaking, listening and reading. A student receives language training throughout the Pipeline. In Phase IV, students attend an 8 or 14 week language blitz depending upon the language they are slotted in. The general purpose of the course is to provide each student with the ability to communicate in a foreign language. For successful completion of the course, the student must achieve at least a 1/1/1 or higher on the Defense Language Proficiency Test in two of the three graded areas; speaking, listening and reading. S. Army War College guide to national security policy and strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College. The fifth edition is published in two volumes that correspond roughly to the Department of National Security and Strategy's core courses: "Theory of war and strategy" and "National security policy and strategy." Like previous editions, this one is based on its predecessor, but contains both updates and new scholarship. Over a third of the chapters are new or have undergone significant rewrites. Many chapters, some of which appeared for years in this work, have been removed. Nevertheless, the book remains unchanged in intent and purpose. Although this is not primarily a textbook, it does reflect both the method and manner that the U.S. Army War College uses to teach strategy formulation to America's future senior leaders. The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process. Both volumes are organized to proceed from the general to the specific. Thus, the first volume opens with general thoughts on the nature and theory of war and strategy, proceeds to look at the complex aspect of power, and concludes with specific theoretical issues. Similarly, the second volume begins by examining the policy/strategy process, moves to a look at the strategic environment, and concludes with some specific issues. This edition continues the effort begun in the 4th edition to include several short case studies to illustrate the primary material in the volume"--Introd. Army Modernization Plan, 2002 Army RD & A. Information Security Architecture, Second Edition incorporates the knowledge developed during the past decade that has pushed the information security life cycle from infancy to a more mature, understandable, and manageable state. It simplifies security by providing clear and organized methods and by guiding you to the most effective resources available. In addition to the components of a successful Information Security Architecture (ISA) detailed in the previous edition, this volume also discusses computer incident/emergency response. The book describes in detail every one of the eight ISA components. Each chapter provides an understanding of the component and details how it relates to the other components of the architecture. The text also outlines how to establish an effective plan to implement each piece of the ISA within an organization. The second edition has been modified to provide security novices with a primer on general security methods. It has also been expanded to provide veteran security professionals with an understanding of issues related to recent legislation, information assurance, and the latest technologies, vulnerabilities, and responses.
