This book explores the emerging trends and patterns in online student evaluations of teaching and how online reviews have transformed the teacher-student relationship as developments in technology have altered consumer behaviors. While consumers at large rely more and more on web-based platforms to purchase commercial products and services, they also make highly personal decisions regarding the choice of service providers in health care, higher education, and other industries. The chapters assess the challenges that web-based platforms such as RateMyProfessors.com pose for service providers in higher education and other industries, and the role of these online consumer review sites in driving consumer expectations. In framing her argument, the author considers the validity of online rating systems and the credibility

and trustworthiness of online consumer reviewers. She also evaluates cultural trends that play a role in perpetuating systems of inequality such as racism, sexism, and ageism in online consumer reviews.

The approach used by Hoyle, Schaefer, and Douppnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting

profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial

reporting as a product of intense and considered debate that continues today and into the future.

The writing style of the eleven previous editions has been highly praised. Students easily

consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting
