Fiscal Crisis and Governance Failures in San Diego

The Power of Faith, Exemplified in the Life and Writings of the Late Mrs. ...

This book examines the politics behind, and the socio-economic and ecological repercussions of, the making of a new township, variously called New Town, Megacity or Jyoti Basu Nagar, in Rajarhat near Kolkata. Conceived by the West Bengal state government in the mid-1990s, in pandering to the vision of urban planners of creating a hi-tech town beyond an unruly, crowded Kolkata, and feeding the hunger of realtors and developers, the city is built on the foundations of coercive, even violent, land acquisition, state largesse and corruption — and at the cost of erasing a self-sufficient subsistence economy and despoiling a fragile environment. Yet, after its completion and departure of construction labour, the new town appears as a necropolis, a ghost city, that belies its promised image of an urban utopia, even as the displaced locals lead a precarious, mobile existence as 'transit labour', engaged in odd and informal jobs. Written on the basis of intensive fieldwork, government documents, court records, and chronicles of

public protests, this book broadly analyses the politics and economics of urbanisation in the age of post-colonial capitalism, particularly the paradoxical combination of neoliberal and primitive modes of capital accumulation upon which the global emergence of 'new towns' is based. Departing from the dominant styles of urban studies that focus on cultural or spatial analysis of cities, the authors show the links between changes in space, technology, political economy, class composition, and forms of urban politics which give concrete shape to a city. It will immensely interest those in sociology, political science, economics, development studies, urban studies, policy and governance studies, and history.

The early 21st century has not been kind to California's reputation for good government. But the Golden State's governance flaws reflect worrisome national trends with origins in the 1970s and 1980s. Growing voter distrust with government, a demand for services but not taxes to pay for them, a sharp decline in enlightened leadership and effective civic watchdogs, and dysfunctional political institutions have all contributed to the current governance malaise. Until recently, San Diego, California—America's 8th largest city—seemed immune to such systematic governance disorders. This sunny beach town entered the 1990s proclaiming to be "America's Finest City," but in a few short years its reputation went from "Futureville" to "Enron-by-the-Sea." In this eye-opening and telling narrative, Steven P. Erie, Vladimir Kogan, and Scott A. MacKenzie mix policy analysis, political theory, and history to explore and explain the unintended but largely predictable failures of governance in San Diego. Using untapped primary sources—interviews with key decision makers and public documents—and benchmarking San Diego with other leading California cities, Paradise Plundered examines critical dimensions of San Diego's governance failure: a multi-billion dollar pension deficit; a chronic budget deficit; inadequate city services and infrastructure; grandiose planning initiatives divorced from dire fiscal realities; an insulated downtown redevelopment program plagued by poorly-crafted public-private partnerships; and, for the metropolitan region, inadequate airport and port facilities, a severe underinvestment in firefighting capacity despite destructive wildfires, and heightened Mexican border security concerns. Far from a sunny story of paradise and prosperity, this account takes stock of an important but understudied city, its failed civic leadership, and poorly performing institutions, policymaking, and planning. Though the extent of these failures may place San Diego in a league of its own, other cities are experiencing similar challenges and political changes. As such, this tale of civic woe offers valuable lessons for urban scholars, practitioners, and general readers concerned about the future of their own cities.

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.
