An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Harley-Davidson Twin Cam engine was first manufactured in 1999, and remains the current design for all Big Twin Harleys. Today, approximately 2 million Twin Cams are out there and many of them need work. Even for those that don't, most Harley riders are looking for "just a little more horsepower," enough to keep up with their buddies on hopped-up Harleys. For anyone wanting to get a little, or a lot, more power from a Twin Cam, this book presents combinations of parts that work together to provide the maximum power for the least amount of money. The crew at R&R Cycles have assembled their favorite combinations, or "recipes," that fall into one of three hop-up categories: Mild, Medium, and Race-Ready. In addition to Twin Cam history and theory, as well as the combinations that work, this new book includes a complete and thorough engine assembly chapter. It has more than 20 pages of sequential photos and detailed captions that explain how a professional shop with a long history of building winning race engines, assembles a Twin Cam that's both fast and very durable.

For Harley-Davidson aficionados, the very name Sportster conjures an image of a fire-breathing mechanical beast scorching the world's tarmac image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head. Here is a powerful testimony of God's ability to turn around even the most desperate of lives. Going from violent drug addict, prisoner and a thief to a bike-riding, God-filled evangelist, Steve Amos was miraculously taken from the pit of hell. Only a near-death experience convinced him that God was real.

'From the Pit of Hell' tells the true story of a man addicted to drugs, of a God who saved and transformed this life, and continues to change and transform lives today. This book is for teenagers, youth leaders and those who have lost their way. It is also a very helpful resource for those working with youth offenders, with a tremendous impact in prisons and drug rehabilitation centres.

Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
