A Decision-making Approach

PostScript & Acrobat/PDF

Note: This is the loose-leaf version of Functional Assessment and does not include access to the Pearson eText. To order the Pearson eText packaged with the loose-leaf version, use ISBN 0133570851. This comprehensive, practical book provides guidelines, strategies, and procedures for preventing and addressing challenging behavior in school settings. The authors take theoretical and often technical information and present it in an easily understood, applicable manner. The functional assessment and intervention model described in the book is a positive and proactive, team-based approach that has been used to prevent and remediate challenging behavior in school, community, and home settings. Readers learn how to conduct behavior assessment that helps them identify the variables that set the occasion for challenging behavior to occur, and that supports challenging behavior after it has occurred. Assessment information is then used to identify the function of challenging behavior and to develop positive interventions that address it, and that teach and support appropriate behaviors to replace challenging behavior.

Originally entitled the "PostScript and Acrobat Bible" in German, this handbook achieves the seemingly impossible: it covers this tricky and technical field in an entertaining manner without getting bogged down in PostScript programming. It explains how several components work together and how to deal with real-world application and operating-system problems. The author genuinely wants to assist in overcoming cross-platform barriers using MS-DOS, Windows, Macintosh or UNIX and, accordingly, neither the book nor the tools are limited to one particular platform or operating system. The 9 chapters and 3 appendixes run the entire gamut, from the very basics right up to Ghostscript and the whole is creatively designed, making use of comical illustrations. In short, essential reading for all technically minded users of PostScript and Acrobat/PDF - from PC owners wanting to get the most out of their laser printers to graphic artists with Macs to system administrators and online publishers.
