What happens when a truly charismatic creative person, full of the joys of life, someone who loves entertaining people, is struck down by one of the cruellest medical fates? This remarkable and unforgettable book, 'A Star in his own Imagination', answers that question. Paul Allen, in telling us about his extraordinary life and his love of life, not only fights back against his medical condition but also shows he is the master of it. As he says: 'This is a lighthearted and sometimes amusing account of my somewhat colourful life. It is full of ups and downs but has never been dull. It will appeal to anyone who has suffered a severe stroke or anyone who just wants to read about my life.' This book will change how you feel about people, about life, about destiny and about love.

Case-based reasoning is one of the fastest growing areas in the field of knowledge-based systems and this book, authored by a leader in the field, is the first comprehensive text on the subject. Case-based reasoning systems are systems that store information about situations in their memory. As new problems arise, similar situations are searched out to help solve these problems. Problems are understood and inferences are made by finding the closest cases in memory, comparing and contrasting the problem with those cases, making inferences based on those comparisons, and asking questions when inferences can't be made. This book presents the state of the art in case-based reasoning. The author synthesizes and analyzes a broad range of approaches, with special emphasis on applying case-based reasoning to complex real-world problem-solving tasks such as medical diagnosis, design, conflict resolution, and planning. The author's approach combines cognitive science and engineering, and is based on analysis of both expert and common-sense tasks. Guidelines for building case-based expert systems are provided, such as how to represent knowledge in cases, how to index cases for accessibility, how to implement retrieval processes for efficiency, and how to adapt old solutions to fit new situations. This book is an excellent text for courses and tutorials on case-based reasoning. It is also a useful resource for computer professionals and cognitive scientists interested in learning more about this fast-growing field.

Master Cisco de Loria wants everything from his new sub Greg Harris ... that is, everything but love. In fact, his contract expressly forbids it. Dr. Greg Harris finally has the money to buy a submissive membership at Indiscreet, a gay BDSM club. The only thing he wants is to have Dr. Cisco de Loria as his Master. Cisco wants Greg, too, but the one thing Greg most wants to give, Cisco refuses to take -- Greg's love. Cisco is so sure he doesn't need love that he puts it in as a clause in their contract. If Greg ever mentions love, the contract is terminated. Cisco finds out the hard way that things somehow don't always work out the way you plan.
