Many customers ask about  
replacing the 470 engine with  
the current 3.0L engine since  
they are also are an inline  
configuration. The problem  
with this is that the 3.0L makes  
approximately 135 Hp & 180  
Lb-Ft of torque where the 470  
made 190 Hp and  
approximately 275 Lb-Ft of  
torque. The 3.0L engine is  
simply too small and does not  
make enough torque.

The previous answers are fine,  
but MerCruiser's engine oil that  
you can buy in quarts (I  
purchase it in bulk 55 gal.  
drums for my marina) is  
actually 25W40 oil. This is  
because a boat engine sees  
around 70 to 80% load ALL  
THE TIME when it is running  
vs. a car engine that sees

anywhere from 20 to 40% load.
