How did we arrive at our contemporary consumer media economy? Why are we now fixated on screens, imbibing information that constantly expires, and longing for more direct or authentic kinds of experience? The Mediated Mind answers these questions by revisiting a previous media revolution, the nineteenth-century explosion of mass print. Like our own smartphone screens, printed paper and imprinted objects touched the most intimate regions of nineteenth-century life. The rise of this printed ephemera, and its new information

economy, generated modern consumer experiences such as voracious collecting and curating, fantasies of disembodied mental travel, and information addiction. Susan Zieger demonstrates how the nineteenth century established affective, psychological, social, and cultural habits of media consumption that we still experience, even as pixels supersede paper. Revealing the history of our own moment, *The Mediated Mind* challenges the commonplace assumption that our own new media lack a past, or that our own experiences are unprecedented. *Master Office 97 Visually™* "An extraordinary, well-done reference guide." — Steve Segal, *Pittsburg Tribune-Review* on *Master Windows® 95 Visually™* Read Less, Learn More *The Revolutionary Way to Learn! The easy way to effectively implement iPads in the classroom The iPad is a natural fit for education in the 21st century, and this hands-on guide shows you just how to implement it in your educational institution. iPad in Education For Dummies serves as a roadmap for the device's successful use as an education tool—from both a personal and institutional perspective. It examines why the iPad is a perfect fit for contemporary educational needs, how to purchase and deploy them within an organization, and outlines best practices, tools, and apps for their educational use across all curricula and grade levels. A cross between a powerful computer, iPod, game console, and e-reader, the iPad is an ultraportable—and ultra cool—touch device from Apple. In 2013, the iPad was deployed in Chicago Public Schools, LA Unified School district, Oxnard School District in California, and Raleigh County Public Schools in West Virginia, to name a few. In this new edition of iPad in Education For Dummies, you'll find the latest coverage of interactive media and augmented reality apps, creating and publishing class books and textbooks, moving from lectures to interactive classroom presentations, setting up digital student profiles, and much more. Includes up-to-date coverage of Apple's iPad hardware and iOS software Covers managing classroom

workflow challenges, including how to distribute, share, collaborate, and collect digital documents Written by one of the foremost authorities on iPad deployments in schools Provides clear information on what decisions you need to make to deploy and use the iPad effectively in the classroom If you're a school administrator, teacher, or educational IT specialist who is considering deploying the iPad in the classroom, this handy guide has everything to set you up for success.

Stories from Asia, Africa and Latin Americas an excellent reference book of Economics and Business Study. It is a best book for researchers and person, who belongs to Economics and Business Study.
In this volume, sixteen distinguished scholars address the impact of digital technologies on

how anthropologists do fieldwork and on what they study. With nearly three billion Internet users and more than four and a half billion mobile phone owners today, and with an ever-growing array of electronic devices and information sources, ethnographers confront a vastly different world from just decades ago, when fieldnotes produced by hand and typewriter were the professional norm. Reflecting on fieldwork experiences both off- and online, the contributors survey changes and continuities since the classic volume *Fieldnotes: The Makings of Anthropology*, edited by Roger Sanjek, was published in 1990. They also confront ethical issues in online fieldwork, the strictures of institutional review boards affecting contemporary research, new forms of digital data and mediated collaboration, shifting boundaries between home and field, and practical and moral aspects of fieldnote recording, curating, sharing, and archiving. The essays draw upon fieldwork in locales ranging from Japan, Liberia, Germany, India, Jamaica, Zambia, to Iraqi Kurdistan, and with diaspora groups of Brazilians in Belgium and Indonesians of Hadhrami Arab descent. In the United States, fieldwork populations include urban mothers of toddlers and young children, teen tech users, Bitcoin traders, World of Warcraft gamers, online texters and

bloggers, and anthropologists themselves. With growing interest in both traditional and digital ethnographic methods, scholars and students in anthropology and sociology, as well as in computer and information sciences, linguistics, social work, communications, media studies, design, management, and policy fields, will find much of value in this engaging and accessibly written volume. Contributors: Jenna Burrell, Lisa Cliggett, Heather A. Horst, Jean E. Jackson, Graham M. Jones, William W. Kelly, Diane E. King, Jordan Kraemer, Rena Lederman, Mary H. Moran, Bonnie A. The tradition of British realism has changed dramatically over the last 20 years, where films by directors such as Duane Hopkins, Joanna Hogg, Andrea Arnold, Shane Meadows and Clio Barnard have suggested a markedly poetic turn. This new realism rejects the instrumentalism and didacticism of filmmakers like Ken Loach in favour of lyrical and often ambiguous encounters with place, where the physical processes of lived experience interacts with the rhythms of everyday life. Taking these 5 filmmakers as case studies, this book seeks to explore in depth this new tradition of British cinema - and in the process, it reignites debates over realism that have concerned scholars for

decades.

Essay from the year 2017 in the subject Romance Languages - General, University of Birmingham, course: PGDipEd Secondary (QTS) French, language: English, abstract: In this discussion, I evaluate my practice with regards to assessment and monitoring progress. I first consider the relevant literature and explore assessment of learning and assessment for learning, as well as suggestions for monitoring pupil progress. Assessment for learning (AfL) is defined by Driscoll, Macaro and Swarbrick as: 'formative assessment and the practical implementation of this by teachers in classrooms'. Assessment of learning (AoL), often referred to as summative assessment, 'identifies the standard of attainment achieved at a particular moment in time'. I then discuss my approach in my research design, followed by a critical evaluation of my progress so far, supported by my documentary evidence. As a key part of the teaching and learning process, assessment is a frequent focus in educational research, both generally and specifically in modern languages (ML). The Office for Standards in Education state that best practice includes 'regular assessment of all four language skills', while the Department for Education (DfE) make no specific mention of assessment in the National Curriculum. This

shows that there are multiple viewpoints on the importance of assessment and monitoring.

Religious traditions in the United States are characterized by ongoing tension between assimilation to the broader culture, as typified by mainline Protestant churches, and defiant rejection of cultural incursions, as witnessed by more sectarian movements such as Mormonism and Hassidism. However, legal theorist and Catholic theologian Cathleen Kaveny contends there is a third possibility—a culture of engagement—that accommodates and respects tradition. It also recognizes the need to interact with culture to remain relevant and to offer critiques of social, political, legal, and economic practices. Kaveny suggests that rather than avoid the crisscross of the religious and secular spheres of life,

we should use this conflict as an opportunity to come together and to encounter, challenge, contribute to, and correct one another. Focusing on five broad areas of interest—Law as a Teacher, Religious Liberty and Its Limits, Conversations about Culture, Conversations about Belief, and Cases and Controversies—Kaveny demonstrates how thoughtful and purposeful engagement can contribute to rich, constructive, and difficult discussions between moral and cultural traditions. This provocative collection of Kaveny's articles from *Commonweal* magazine, substantially revised and updated from their initial publication, provides astonishing insight into a range of hot-button issues like abortion, assisted suicide, government-sponsored torture, contraception, the Ashley Treatment, capital punishment, and the role of religious faith in a pluralistic society. At turns masterful and inspirational, *A Culture of Engagement* is a welcome reminder of what can be gained when a diversity of experiences and beliefs is brought to bear on American public life.

A powerful new understanding of cooperation as an antidote to alienation and inequality From the crises of racial inequity and capitalism that inspired the Black Lives Matter movement and the Green New Deal to the coronavirus pandemic, stories of mutual aid have shown that, though cooperation is variegated and ever changing, it is also a form of economic solidarity that can help weather contemporary social and economic crises. Addressing this theme, *Practicing Cooperation* delivers a trenchant and timely argument that the way to a more just and equitable society lies in the widespread adoption of cooperative practices. But what renders cooperation ethical, effective, and sustainable? Providing a new conceptual framework for cooperation as a form of social practice, *Practicing Cooperation* describes and critiques three U.S.-based cooperatives: a pair of co-op grocers in Philadelphia, each adjusting to recent growth and renewal; a federation of two hundred low-cost community acupuncture clinics throughout the United States, banded together as a cooperative of practitioners and patients; and a

collectively managed Philadelphia experimental dance company, founded in the early 1990s and still going strong. Through these case studies, Andrew Zitcer illuminates the range of activities that make contemporary cooperatives successful: dedicated practitioners, a commitment to inclusion, and ongoing critical reflection. In so doing he asserts that economic and social cooperation must be examined, critiqued, and implemented on multiple scales if it is to combat the pervasiveness of competitive individualism. Practicing Cooperation is grounded in the voices of practitioners and the result is a clear-eyed look at the lived experience of cooperators from different parts of the economy and a guidebook for people on the potential of this way of life for the pursuit of justice and fairness.

This book contains two official government documents: 1. Medicare handbook for 2014. 2. Medicare costs for 2014. Both documents are available from Medicare. Welcome to “ Medicare & You ” 2014 This is an exciting and historic time for health

care in our nation. Today, thanks to the Affordable Care Act, we have stronger, more reliable health coverage to help all Americans get or stay healthy. Also, millions of people with Medicare like you have:

- Taken advantage of expanded benefits like preventive services, cancer screenings, and yearly “ Wellness ” visits — without paying a dollar out-of-pocket.
- Saved money in the prescription drug coverage gap (“ donut hole ”) with big discounts on covered brand-name drugs.
- Used new tools like Medicare's Blue Button on MyMedicare.gov. Speaking of the Blue Button, if you haven't tried it yet, now's the best time to check it out. We've expanded it to let you view and download even more of your claims information to give you a better picture of your overall health. This can help you make more informed decisions about your care and can help you give your health care providers a more complete view of your health history. These changes are only the beginning. Starting January 1, 2014, millions of people without Medicare will have access to quality health

insurance through the new Health Insurance Marketplace. This means that your family, friends, and neighbors who don't have health insurance now will have what you love about Medicare — the peace of mind that comes from being covered. The Marketplace isn't changing Medicare. No matter how you get Medicare, you'll still have the benefits and security you have now. Medicare will be here for you, stronger than ever. If you have specific questions about Medicare, visit Medicare.gov to find the answers you need. You also can call 1-800-MEDICARE (1-800-633-4227). TTY users should call 1-877-486-2048. For more information about the Marketplace, visit HealthCare.gov. My Sociology reconceptualizes intro sociology for the changing demographics in today ' s higher education environment. Concise and student-focused, My Sociology captures students' attention with engaging stories and a focus on non-dominant populations. When Parliament sought to raise funds through the passing of the Stamp Act in 1765, they did not anticipate the protests and staunch opposition to the new law that would ensue in the colonies. Though the crisis was eventually resolved, the larger questions raised by Parliament's action and colonial resistance remained unanswered. What started as a debate over taxation would end in a struggle for independence. The Stamp Act Crisis, 1765–1766, marks the transition in United States history from the Colonial Era to the Era of the American Revolution. The full narrative of the Stamp Act includes political, social, economic, and cultural histories on both sides of the Atlantic. This volume provides the reader with the opportunity to engage with the pamphlets, letters,

speeches, legal documents, and other texts and images that people in the colonies and in London were themselves reading, debating, and reacting to at the time. The introduction incorporates recent scholarship and provides a fresh look at this key moment in American history, and the informative headnotes and rich annotations help orient the reader within the historical sources.

Access to safe, adequate, and nutritionally balanced food is a cornerstone of public health. Food Policy: Looking Forward from the Past examines the influences of grassroots movements, the government, and industry on the US food systems. The authors explore the intersection of food and nutrition and how policy influences this overlap. They illumina An informed argument for reworking the broken market-based U.S. healthcare system by making cost and quality more transparent The United States has the most expensive healthcare system in the world. While policy makers have argued over who is at fault for this, the

system has been quietly moving toward high-deductible insurance plans that require patients to pay large amounts out of pocket before insurance kicks in. The idea behind this shift is that patients will become better consumers of healthcare when forced to pay for their medical expenses. Laying bare the perils of the current situation, Peter A. Ubel—a physician and behavioral scientist—notes that even when patients have time to shop around, healthcare costs remain largely opaque, difficult to access, and hard to compare. Arguing for a middle path between a market-based and a completely free system, Ubel envisions more transparent, smarter healthcare plans that tie the prices of treatments to the value they provide so that people can afford to receive the care they deserve.

The Politics of Cybersecurity in the Middle East
An Introduction for Today's Students
Practicing Cooperation

Food Policy

Cybersecurity is a complex and contested issue in international politics. By focusing on the 'great powers'—the US, the EU, Russia and China—studies in the field often fail to capture the specific politics of cybersecurity in the Middle East, especially in Egypt and the GCC states. For these countries, cybersecurity policies and practices are entangled with those of long-standing allies in the US and Europe, and are built on reciprocal flows of data, capital, technology and expertise. At the same time, these states have authoritarian systems of governance more reminiscent of Russia or China, including approaches to digital technologies centred on sovereignty and surveillance. This book is a pioneering examination of the politics of cybersecurity in the Middle East. Drawing on new interviews and original fieldwork, James Shires shows how the label of cybersecurity is repurposed by states, companies and other organisations to encompass a

variety of concepts, including state conflict, targeted spyware, domestic information controls, and foreign interference through leaks and disinformation. These shifting meanings shape key technological systems as well as the social relations underpinning digital development. But however the term is interpreted, it is clear that cybersecurity is an integral aspect of the region's contemporary politics.

An Autodesk Official Press guide to the powerful mechanical design software Autodesk Inventor has been used to design everything from cars and airplanes to appliances and furniture. This comprehensive guide to Inventor and Inventor LT features real-world workflows and work environments, and is packed with practical tutorials that focus on teaching Inventor tips, tricks, and techniques. Additionally, you can download datasets to jump in and practice on any exercise. This reference and tutorial explains key interface conventions, capabilities, tools, and techniques, including design concepts and application, parts

design, assemblies and subassemblies, weldment design, and the use of Design Accelerators and Design Calculators. There's also detailed coverage of design tactics for large assemblies, effective model design for various industries, strategies for effective data and asset sharing, using 2D and 3D data from other CAD systems, and improving designs by incorporating engineering principles. Uses real-world sample projects so you can quickly grasp the interface, tools, and processes. Features detailed documentation on everything from project set up to simple animations and documentation for exploded views, sheet metal flat patterns, plastic part design, and more. Covers crucial productivity-boosting tools, iLogic, data exchange, the Frame Generator, Inventor Studio visualization tools, dynamic simulation and stress analysis features, and routed systems features. Extracting Home in the Oil Sands Leadership and Management in Trying Times The Metamorphosis of the European Economic Constitution The Canadian oil sands are one of the world's most important energy sources and the subject of global attention in relation to climate change and pollution. This volume engages ethnographically with key issues concerning the oil sands by working from anthropological literature and beyond to explore how people struggle to make and hold on to diverse senses of home in the region. The contributors draw on diverse fieldwork experiences with communities in Alberta that are affected by the oil sands industry. Through a series of case studies, they illuminate the complexities inherent in the entanglements of race, class, Indigeneity, gender,

and ontological concerns in a regional context characterized by extreme extraction. The chapters are unified in a common concern for ethnographically theorizing settler colonialism, sentient landscapes, and multispecies relations within a critical political ecology framework and by the prominent role that extractive industries play in shaping new relations between Indigenous Peoples, the state, newcomers, corporations, plants, animals, and the land. Administrative asylum procedures are permeated by tensions between rationalities of legality, efficiency, and deterrence in asylum casework and their various effects on cases. Based on ethnographic research in the Swiss asylum administration, this book

unveils the pragmatics and politics of rendering asylum cases resolvable by recording the lives of applicants in terms of asylum. With his reading of power and agency in administrations, Ephraim Pörtner offers a critical view of the intricate relationship between practices of asylum casework and the governmental need to resolve claims of people seeking protection. While policymakers in the world reiterate the importance of protecting voice diversity, traditional media conglomerates and new social media giants make their task increasingly challenging. This book assesses the current state of policy-making on media plurality and explores novel policy ideas for funding, regulatory and structural

Internship Report from the year 2016 in the subject Computer Science - Applied, University of Science and Technology of Hanoi, course: Internship, language: English, abstract: In this project, I created and augmented a dataset from a number of given images to train and test convolutional neural network which is used to classify five classes of images of scanned documents. In order to generate the dataset, some image processing techniques were applied such as sliding-window, rotating, flipping and pyramid-sizing. The result of this phase is a set

of images having same size 244x224x3. These images after being labeled were divided into three dataset for training, validating and testing the network. The network is a simple convolution neural network which is also called LeNet. It has three convolutional layers and one fully connected layer. After being trained and validated, the best state of the network was pointed out and tested on the testing dataset and some real images. The result showed that the LeNet was able to classify images of documents in a pretty high accuracy. At the end of the project, I modified the network and discussed the affect that those changes had on the network with the purpose of creating another similar network which can perform better than the original one.

The result proved that it worked a little better than its original version. Objective Troy tells the gripping and unsettling story of Anwar al-Awlaki, the once-celebrated American imam who called for moderation after 9/11, a man who ultimately directed his outsized talents to the mass murder of his fellow citizens. It follows Barack Obama's campaign against the excesses of the Bush counterterrorism programs and his eventual embrace of the targeted killing of suspected militants. And it recounts how the president directed the mammoth machinery of spy agencies to hunt Awlaki down in a frantic, multi-million-dollar pursuit that would end with the death of Awlaki by a bizarre, robotic technology that is changing warfare—the drone. Scott Shane, who has

covered terrorism for The New York Times over the last decade, weaves the clash between president and terrorist into both a riveting narrative and a deeply human account of the defining conflict of our era. Awlaki, who directed a plot that almost derailed Obama's presidency, and then taunted him from his desert hideouts, will go down in history as the first United States citizen deliberately hunted and assassinated by his own government without trial. But his eloquent calls to jihad, amplified by YouTube, continue to lure young Westerners into terrorism—resulting in tragedies from the Boston marathon bombing to the murder of cartoonists at a Paris weekly. Awlaki's life and death show how profoundly America has been changed by

the threat of terrorism and by our own fears. Illuminating and provocative, and based on years of in depth reporting, Objective Troy is a brilliant reckoning with the moral challenge of terrorism and a masterful chronicle of our times.

This report addresses the development challenges facing young people in the Arab region. The current young generation is the largest this region has had over the past 50 years, making up 30% of its population. In light of the youth-led movements during and after the 2011 uprisings, the report argues for a renewed policy focus on youth development in the region. It deals with the pillars of human development (income, education and health) with the attainment, achievement and equitable

distribution of education, and with the challenges of finding stable and decent jobs. With protracted conflict in several Arab countries, young Arabs have become victims or perpetrators of violence, challenged by difficulties of mobility and migration. AHDR 2016 aims to engage youth in building a better future. "[A] relentless exploration . . . The story of Meyer's murder, and its cover up, is one more fascinating footnote to the Kennedy assassination." —David Talbot, New York Times—bestselling author The death of Mary Meyer left many Americans with questions. Who really killed her? Why did CIA counterintelligence chief James Angleton rush to find and confiscate her diary? Had she discovered the plan to assassinate her lover,

President Kennedy, with the trail of information ending at the steps of the CIA? Was it only coincidence that she was killed less than three weeks after the release of the Warren Commission Report? Fans of The Murder of Mary Russell, JFK: A Vision for America, and other JFK books will love Mary's Mosaic. Building and relying on years of interviews and painstaking research, author Peter Janney follows the key events and influences in Mary Pinchot Meyer's life—her first meeting with Jack Kennedy; her support of her secret lover, President Kennedy, as he worked towards the pursuit of world peace and away from the Cold War; and her exploration of psychedelic drugs. Fifty years after the assassinations of President Kennedy and Mary Meyer, this book helps readers understand

why both took place. Author Peter Janney fought for two years to obtain documents from the National Personnel Records Center and the US Army to complete this third edition. It includes a final chapter about the mystery man who could be the missing piece to learn the truth behind Meyer's murder. "Reads like a John Grisham thriller crossed with an Oliver Stone movie." —The Boston Globe "A fascinating story . . .
