Consistent with the philosophy of the Common Core State Standards and Standards for Mathematical Practice, the Big Ideas Math Student Edition provides students with diverse opportunities to develop problem-solving and communication skills through deductive reasoning and exploration. Students gain a deeper understanding of math concepts by narrowing their focus to fewer topics at each grade level. Students master content through inductive reasoning opportunities, engaging activities that provide deeper understanding, concise, stepped-out examples, rich, thought-provoking exercises, and a continual building on what has previously been taught.

This collection about obsession and love is the 99th volume of the Yale Series of Younger Poets Richard Siken's Crush, selected as the 2004 winner of the Yale Younger Poets prize, is a powerful collection of poems driven by obsession and love. Siken writes with ferocity, and his reader hurtles unstoppably with

him. His poetry is confessional, gay, savage, and charged with violent eroticism. In the world of American poetry, Siken's voice is striking.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

"University Physics is a three-volume collection that meets the scope and sequence requirements for two- and three-semester calculus-based physics courses. Volume 1 covers mechanics, sound, oscillations, and waves. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. Frequent, strong examples focus on how to approach a problem, how to work with the equations, and how to check and generalize the result."--Open Textbook Library.

Lois Lowry once again creates a mysterious but plausible future world. It is a society ruled by savagery and deceit that shuns and discards the weak. Left orphaned and physically flawed, young Kira faces a frightening, uncertain future. Blessed with an almost magical talent that keeps her alive, she struggles with ever broadening responsibilities in her quest for truth, discovering things that will change her life forever. As she did in THE GIVER, Lowry challenges readers to imagine what our world could become, how people could evolve, and what could be considered valuable. Every reader will be taken by Kira's plight and will long ponder her haunting world and the hope for the future. This practical coursebook introduces all the basics of semantics in a
simple, step-by-step fashion. Each unit includes short sections of
explanation with examples, followed by stimulating practice
exercises to complete in the book. Feedback and comment
sections follow each exercise to enable students to monitor their
progress. No previous background in semantics is assumed, as
students begin by discovering the value and fascination of the
subject and then move through all key topics in the field, including
sense and reference, simple logic, word meaning and interpersonal
meaning. New study guides and exercises have been added to the
end of each unit to help reinforce and test learning. A completely
new unit on non-literal language and metaphor, plus updates
throughout the text significantly expand the scope of the original
edition to bring it up-to-date with modern teaching of semantics
for introductory courses in linguistics as well as intermediate
students.
