Galaxy S4: The Missing Manual

A Quick And Easy Guide With Tips & Tricks To Master Your Galaxy Watch Active

Vol. 1, Issue 1 - Digital Material/ism

""Buku ini dibuka dengan teka-teki

berikut ini: Produk atau merek apa yang paling sukses di dunia semenjak adanya planet bumi ini? Coca Cola? Apple?

Microsoft? Facebook? Gatot Kaca? Semua jawaban di atas benar. Namun, yang lebih benar dan tak terkalahkan kesuksesannya adalah...

AGAMA = Religion & Spirituality! Agama sebagai sebuah

""produk"" dengan berbagai ""merek""-nya memiliki umur yang

paling lama. Semua konsumennya loyal. Mereka selalu menceritakan hal-hal baik tentang ""merek""-nya. Kenapa bisa

begitu? Apakah karena agama pernah mendatangi agency untuk membuat iklan? Atau apakah karena agama pernah

d mendatangi media planner untuk minta saran? Tidak. Satu hal yang sama dari semua merek dalam ""kategori

produk"" agama adalah: MEREKA TIDAK BERIKLAN. Resepnya cuma satu: ""getok tular"" (dari mulut ke mulut),

rekomendasi dari satu orang ke orang lainnya, dari satu generasi ke generasi lainnya, dari satu kelompok ke kelompok

lainnya. Efektif? YA! Kredibel? SO

PASTI! Konsumen loyal? GAK PERLU DITANYA! Buku ini akan memperlihatkan semakin redupnya kekuatan iklan dan semakin perkasanya "kekuatan mulut ke mulut". Contoh-contohnya aplikasinya sangat banyak, sangat inspiratif, dan bisa Anda uji cobakan untuk produk/jasa Anda... ada tips dan trik yang perlu Anda pelajari dan itu disuguhkan di sini dengan bahasa dan penyajian sangat menarik. "Selama tiga tahun ini, Majalah SWA tlah bersama-sama melakukan penelitian tentang 'Word of Mouth' yang terjadi di kalangan konsumen Indonesia dan disajikan sebagai sajian utama SWA. Buku ini merupakan intisari tentang apa dan bagaimana mengembangkan Word of Mouth Marketing yang menarik dan menjual serta memberikan panduan praktis bagi para pemasar Indonesia." --Kemal Effendi Gani, Pemimpin Redaksi/Pemimpin Umum Majalah SWA "Word of Mouth Marketing! Mungkin Anda sudah sering mendengar hal itu, namun bila belum punya referensi yang mudah dipahami, maka buku 'The Power of Word of Mouth Marketing' ini patut dibaca. Buku ini menyajikan konsep dan tips menjalankan WOMM dengan bahasa yang sederhana dan 'provokatif', serta dilengkapi berbagai contoh, termasuk contoh-contoh dari Indonesia. Kita bisa tahu tren social media, perlunya kepekaan terhadap hal-hal yang sedang in dan lebih penting, bagaimana memanfaatkannya untuk membantu komunikasi pemasaran kita. Saat kita mulai mempertanyakan efektivitas belanja iklan kita, membaca buku ini bisa menjadi langkah awal kita untuk mulai berpikir ulang tentang konsep komunikasi pemasaran." --Bambang Sumaryanto, Director P&G Indonesia "Mengupas lengkap mengenai semua hal yang perlu diketahui tentang 'Word of Mouth Marketing' (WOMM) dan hal-hal yang perlu diketahui untuk mengubah Negative WOMM menjadi Positive WOMM. Direkomendasikan bagi mereka yang ingin melakukan terobosan bagi produknya

lewat Marketing Word of Mouth." --Afan Suryadi, Marketing Director English First (EF) Indonesia "Buku yang patut disimak buat yang percaya dengan perubahan psikografi konsumen di era pesatnya perkembangan media sosial yang makin memperkuat 'Word of Mouth Marketing'. Dengan contoh kasus yang aktual, buku ini menantang paradigma para pemasar untuk meninjau ulang strategi komunikasinya." --Mardi Wu @wumard, CEO PT Nutrifood Indonesia ""

"Here is a volume that has no parallel. . . . A good reference book for those interested in the details of avian anatomy."--Science Books & Films "A gold mine of facts. . . . Every library and biology department, as well as every birder, should have a copy close at hand."--Roger Tory Peterson, from the foreword One of the most heavily illustrated ornithology references ever written, *Manual of Ornithology* is a visual guide to the structure and anatomy of birds--a basic tool for investigation for anyone curious about the fascinating world of birds. A concise atlas of anatomy, it contains more than 200 specially prepared accurate and clear drawings that include material never illustrated before. The text is as informative as the drawings; written at a level appropriate to undergraduate students and to bird lovers in general, it discusses why birds look and act the way they do. Designed to supplement a basic ornithology textbook, the *Manual of Ornithology* covers systematics and evolution, topography, feathers and flight, the skeleton and musculature, and the digestive, circulatory, respiratory, excretory, reproductive, sensory, and nervous systems of birds, as well as field techniques for watching and studying birds. Each chapter concludes with a list of key references for the topic covered, with a comprehensive bibliography at the end of the volume.

This book discusses the challenges facing business schools and management

education systems around the world. Based on documented descriptions of institutional and competitive dynamics in the 'industry' of management education, the authors show how management education is going through major changes such as new governance and business models, mergers and acquisitions, internationalisation of faculty and students coexisting with entrenchment in local markets, ever more needs for financial resources, development of distant and blended learning, and increasing pressure for research output to boost rankings. With concerns surrounding the sustainability of current trends in faculty salary inflation, social acceptability of higher fees, cost of distance learning and the risk of an academic-industry divide around knowledge produced by management research, *The Future of Management Education* develops an analysis of business models and discusses strategic implications for stakeholders. The second volume extends the discussion to a total of 23 countries to bring a genuinely global perspective and move away from the Euro-centric outlook. The countries covered in the second volume include China, Brazil, Russia, Singapore and France. The text has been divided in two volumes: Volume I (Ch. 1-13) & Volume II (Ch. 14-22). In addition to the review material and some basic topics as discussed in the opening chapter, the main text in Volume I covers topics on infinite series, differential and integral calculus, matrices, vector calculus, ordinary differential equations, special functions and Laplace transforms. Volume II covers topics on complex analysis, Fourier analysis, partial differential equations and statistics. The present book has numerous distinguishing features over the already existing books on the same topic. The chapters have been planned to create interest among the readers to study and apply the mathematical tools. The subject has been

presented in a very lucid and precise manner with a wide variety of examples and exercises, which would eventually help the reader for hassle free study.

Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently

used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.

» Digital Culture & Society « is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiry into digital media theory. The journal provides a venue for publication for interdisciplinary research approaches, contemporary theory developments and methodological innovation in digital media studies. It invites reflection on how culture unfolds through the use of digital technology, and how it conversely influences the development of digital technology itself. The inaugural issue » Digital Material/ism « presents methodological and theoretical insights into digital materiality and materialism. Advances in Human Aspects of Road and Rail Transportation
