The Robbie Burns Revival & Other Stories

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

These linked short stories tell the tales of Tony Aardehuis, a young Ontario police officer who centres more on the human puzzle than on crime and detection. Fraud, theft, blackmail: every small town crime short of murder drives these stories to conclusions that usually warm the heart. Along the way

Tony struggles, like the rest of us, to figure it all out. The first Tony Aardehuis story was inspired by the Eastern Ontario ice storm of 1998 and the suggestion that natural disaster might double as a murder weapon. This constable meets life with a fine blend of curiosity, compassion and an occasional bent for bending the rules. Tony Aardehuis's adventures have been published in The Grist Mill, Bone Dance, and Storyteller Magazine, where he twice won The Great Canadian Story Contest. One story is also shortlisted for a 2003 Arthur Ellis Award.
