Fischer RWritten by leading academics, bankers, and consultants, this book discusses major issues in corporate governance. The papers concentrate upon the financing of corporations, and the role of the banks and stock markets in the United Kingdom, Germany, and Japan. A central theme of the book is a constant awareness of the links between the accountability of senior managers, the system of corporate governance, and the performance of a company. The contributors examine the role of shareholders, company boards, and managers under a market-based system as in the UK and USA, in comparison with the 'insider' system found in Japan and,

to a lesser extent, Germany. They discuss the view that this UK system leads to a preoccupation with short-term corporate performance and a greater likelihood of hostile takeovers. The contribution of the banks to corporate finance and control is also examined, including a discussion of the special problems of small forms. The Japanese and the German financial and corporate systems are authoritatively analysed. Report (to Accompany H.R. 395) (including Cost Estimate of the Congressional Budget Office). The Guide to International

Legal Research is an

authoritative and

comprehensive reference tool for law students and practitioners. Authored annually by The George Washington International Law Review, the Guide is designed to assist both novices and professionals with their international legal research. Following an introduction by Professor Christopher J. Borgen, the Guide is organized into two parts. In the first part, chapters are divided by regions. Each regional chapter includes an overview of the geopolitical climate in that region and lists government resources, legal resources, media resources, and resources by topic. Where appropriate, these sources are subdivided by country. Many of the chapters discuss general multinational organizations as well as international trade organizations and agreements that are specific to the region. The Guide also provides an overview of what each source covers and how it can be most effective. The second part of the Guide covers substantive areas of international law, including general international law, public health law, space law, human rights law, group rights, intellectual property, international trade, international business transactions, tax law, environmental law, labor law, and international security law, among other topics. Much like the regional sections, the substantive chapters begin with a section on international governance followed by a section on secondary sources pertinent to that subject area.
